Supplementary File 1. Number of individuals of *Myrcia* from the BDFFP plots sampled per species, additional samples retrieved from other sites, and means of species level identification.

Metadata

<i>column</i>	<i>definition</i>
species	Scientific name of the species
fertile material	Availability of fertile material
BDFFP specimens	Number of samples from the BDFFP plots used
additional specimens	Number of samples from other localities used
identification in species level	Means of identification in genus, species, or <i>species affinis</i> level

Data

species	fertile material	BDFFP specimens	additional specimens	identification in species level
<i>Myrcia amazonica</i>	yes	10		BDFFP fertile material
